

Custom CSS

For manual customisation the application provides a CSS input field that allows you to accurately and flexibly customize the application components style.

List of application element selectors:

1. `.Button-Preorder-Cart` — pre-order button for adding products to the cart.
2. `.kad-preorder-preorder-badge` — badge added to the pre-order product image on the collection page.
3. `.tippy-active` — confirmation button for redirecting to checkout.
