

KAD Pre-order

It will help you to set not only products, but every single variant for pre-order separately. Specify a time period, during which pre-orders will be available. Translate App buttons, tooltips and other texts into different languages. Enable partial payments in the amount of the percentage of the total cost. Put "pre-order" badges on the collection page to highlight the pre-ordered product. Notify your customers on the cart page and via Email making sure they did not miss all the terms and conditions of making a pre-order. In addition App automatically integrates into the store theme when installing or changing the theme.

Application plans

In light of the transition to new plans that are not related to Shopify ones, our application now has Relevant and Archived plans.

STARTER	STANDARD	PRO
10 products can be set for pre-order (all their variants included)	30 products can be set for pre-order (all their variants included)	Unlimited products and variants can be set for pre-order
Cart pre-order labels	+ STARTER features	+ STANDARD features
Mixed cart notification	Email notifications	Partial payment
Pre-order badges		Multilanguage

In order to change the plan do the following:

- Go to the "Settings" tab
- Find section where your current plan is specified and click "Update plan"
- Choose the required plan and click "Choose Plan" or "Start Pro Trial"

Note: App can also offer you a plan upgrade if you will try to set up the features that are not included in your current plan.

Archived plans

Pre-order setting and using

Interface tabs

- "Dashboard" tab is for managing pre-orders made by your customers.
- "Products" tab is made for individual and mass setting up pre-order products/variants.
- "Settings" tab is to be used for rewriting default values, activating specific features and changing App plan.

Enabling pre-orders for products and variants

Product

- Go to the "Products" tab.
- Choose the product(s) you want to activate from the list or use "Search" to find one(s) you need.
- Check the box "Enable pre-orders" in the right opened setting block.
- Set the number of pre-orders you are planning to sell in "Quantity limit".
- Click "Save".

Variant

- Choose the product which variant(s) you want to set.
- Click the "Variants" tab in the right opened settings block.
- Set the required variant(s) the same way as products:
 - Choose the variant(s) you want to activate from the list.
 - Check the box "Enable pre-orders" in the left opened setting block.
 - Set the number of pre-orders you are planning to sell in "Quantity limit"
 - Click "Save".

Disabling pre-orders for products and variants

Product

- Go to the "Products" tab.
- Choose the product(s) you want to deactivate from the list or use "Search".
- Uncheck the box "Enable pre-orders" in the right opened setting block.
- Click "Save".

Variant

- Choose the product which variant(s) you want to deactivate.
- Click the "Variants" tab in the right opened settings block.
- Disable the required variant(s) the same way as products:
 - Choose the variant(s) you want to deactivate from the list.
 - Uncheck the box "Enable pre-orders" in the left opened setting block.
 - Click "Save".

Please check products/variants statuses before leaving the App.

Product/variant status

- No badge — pre-order for this product/variant is not enabled.
- **active** — pre-order for this product/variant is active and this item is available to preorder.
- **active 5 variants** — pre-orders are active for 5 variants of this product.
- **in stock** — this product has available items in stock. As a result, this product cannot be pre-ordered and have "Add to Cart" button on the product page.
- **limit reached** — number of pre-orders that you were planning to sell reached the limit. Check the value of the "Quantity limit" field for the product.
- **schedule: waiting** — the scheduled pre-order period has not started yet.
- **schedule: passed** — the scheduled pre-order period has already finished.

Creating a pre-order by the store manager

To create a pre-order by the store manager, you must have a plan that supports partial payment. The following steps are required:

1. In the store choose necessary products and add to cart.
2. Press Checkout. You will be taken to the checkout page.
3. You can copy the link to this page and send it to the client or close it and go to the admin panel.
4. In the admin panel open the list of draft orders (/admin/draft_orders) and perform the necessary actions: make a payment or send an invoice to the client.
5. After payment, the order draft will be processed by the application and supplemented with the original products.

App installation and removal

Please disable all similar applications before use.

Installation

[Install the application](#) from Shopify App Store by clicking "Add app". After completing these steps, our application is ready to work.

If *Snippet* or application code in *theme.liquid* were accidentally removed from the store theme, use [Manual installation](#).

Integration

During installation app automatically integrate into the store theme without additional setting or coding. The same process will be applied when you change the theme. Intergration into a new theme will be made without any manual actions.

Removal

In order to remove the App from your store all you need to do is click "Apps" tab in your store Admin, find our App and click "Delete"

If all App code pieces also need to be deleted from your store theme you can use [Manual removal](#).
