

Simple Pre-order

Installation

Install our application is very easy, you need to go to Shopify App Store, find our application and click "Add app". After completing these steps, our application will be ready to work.

Note, that you need to disable all similar applications before use.

[Manual installation](#)

Uninstallation

Just go into the app listing admin area of your Shopify store, then click on the trash icon. After the application is deleted, all changes made to it in your store will be canceled.

Setting up and using

When you first visit our application, the configuration wizard will open, which will show you how our application works. The setup wizard will create a test product. You will need to make sure that the pre-order button appears on test product page. If you see the pre-order button, press "I see the pre-order button" otherwise click on "I can not see the pre-order button".

Go to the "Settings" tab and configure the application as you like. In the "Products" tab, you can click on the product and activate pre-order for it. You can also select several products and change settings for everyone. The fields that you leave empty will not be changed in bulk editing mode.

Configuring pre-orders for products and variants

In order to activate the pre-order for a product:

1. Click the "Products tab".
2. Click on the product you want to activate.
3. Tick "Enable pre-orders" checkbox in the settings block in the right column.
4. Set the "Quantity limit" of available pre-orders more than 0.
5. Click "Save".

If you want to configure the pre-order for variants of a product:

1. Click on the product which variants you want to configure.
2. Click the "Variants tab" in the settings block in the right column.
3. Configure each variants like you do it for products

4. In order to go back click to the Products tab in the settings block in the left column.

If you see the green "active" badge, that means pre-orders for this product are active and button available on product page, and if you can see, for example, "active 5 variants" that means pre-orders for 5 variants of the product are active and button available on product page when you switching to them.

Pre-order availability date range setting

In order to set a certain pre-order availability period for a specific product or for several at once:

1. Select the products or product variants you need to set up your period.
2. Tick "Enable schedule" checkbox in the pre-order settings block.
3. Select the start date for pre-orders and click on it in the calendar.
4. In order to set an end date for pre-orders, select this date and click on it in the calendar.
5. Click "Save".

If you want to disable the pre-order period setting for the selected product or several:

1. Select the products or product variants for which you would like to disable the pre-order period.
2. Untick "Enable schedule" checkbox in the pre-order settings block.
3. Click "Save".

Changing the theme

After changing the theme in your store, you need to [uninstall](#) the application and then [install](#) it again.

Support work schedule

- Monday to Friday from 7:00 am to 3:00 pm GMT+0 London.
